

# FlexTRADER EMS

Foreign Exchange, FlexFX

## Trading in a Rapidly Changing Foreign Exchange Market

FlexTrade Systems' Foreign Exchange Solution, FlexFX, is an award-winning, algorithmic trading and execution management system for buy-side institutions. FlexFX offers advanced FX execution capabilities, deep liquidity, trade analytics as well as fully integrated post-trade allocation solutions, making your workflows as efficient as possible.

Trusted by the world's largest asset managers and hedge funds, FlexFX enables traders to manage and efficiently execute large number of orders across multiple liquidity providers, optimally netting by value date and order directions while observing broker restrictions.

### FlexFX Trade Your Best

In a highly fragmented market, FlexTrade's FlexFX product provides a real-time, aggregate overview of FX prices in a single, fully customizable, broker-neutral, cross-asset front-end solution, so that you as a trader can perform at your best.

Take your trading to the next level with FlexFX's AlgoWheel by automating small orders and freeing up the desk to focus on large and complex trades. Automation rules can be customized based on order and market data events, including pre-trade costs, and route trades for best execution.

### Why FlexFX?

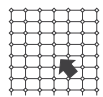

FlexFX offers a complete single source EMS service with "direct to market" connectivity that trading professionals need to effectively manage their business and perform competitively in today's global eFOREX marketplace.

**Execution Flexibility:** Expansive ways to execute orders and baskets, with automation possibilities. Execute against RFS/Q, Streams, Basket RFS, SSP, Broker Algos or Flex Algos, and Voice.

BID	ASK
20K 1.9823	20K 1.9833
25K 1.9822	30K 1.9832
30K 1.9821	40K 1.9831
35K 1.9821	50K 1.9911
...	...

**Deep Liquidity:** Aggregate pricing across Banks, Non-Banks and ECNs onto one executable screen. Provide streaming Market Data via API.

**Analytics:** Pre-, intra-, and post-trade analytics to select liquidity providers, view market impact, and analyze spread/decay. Dynamically adjust real-time trading rules based on post-trade analysis & outcomes.

**Sell-side Interaction:** Trade directly with sales coverage at banks. Convert voice trades to electronic trades, negotiate forward points, and move large blocks.
