

Buy-Side Trading Solutions

FlexONE™ OEMS

Seamlessly Integrated Multi-Asset Order and Execution Management

Buy-side Institutions are facing a growing demand for cross-asset strategies that can add a fair amount of risk and complexity around order management workflows. FlexONE™ anticipates the need for trading desks to have order-entry workflow and execution on the same platform.

FlexTrade's FlexONE™ is the next generation multi-asset Order and Execution Management System (OEMS) for hedge funds, asset managers, and unique trading desks connecting over 300 brokers via our FlexLINK broker network. It has been built from the ground up with performance, scalability and flexibility in mind.

Why FlexONE™?

Multi-Asset Platform

FlexONE supports equities, fixed income, cash, foreign exchange, and corresponding derivatives. Built on open architecture principles, it solves even the most complex order workflows.

Technology First

Built from the ground up using state-of-the-art gRPC API framework to maximize performance. FlexONE can handle thousands of orders and millions of executions while processing full order life cycle events.

Designed for Complex Workflows

Streamline your most complex workflows with an integrated execution and order management system. Our technology is built to scale: From simple to complex by handling order-entry workflow and execution in the same place. Enable easy implementation.

Bring Your Strategy to the Next Level

FlexTrade offers a robust quantitative solutions offering, including, analytics and algorithms so you can focus on best execution and strategy.
